

SGCMH Patient Portal App

Go to your app store & install the **MEDITECH MHealth** app.

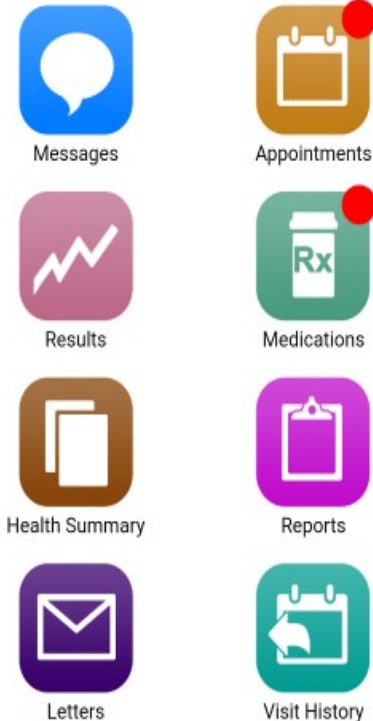

When you first open the app, you will be prompted to allow MHealth to access your device's location. Choose what you are comfortable with.

If you clicked **Allow**, and are in Ste. Genevieve or Bloomsdale, then the **Portals Near Me** option will show the SGCMH portal.

If you did not click **Allow**, then click the **Near Me** option, change it to **By State**, and select **Missouri**.

When you find the **Ste. Genevieve County Memorial Hospital Patient Portal** icon (shown here), click to open your portal.

You will log in with your normal portal login ID and password.

The screen will look a little different, but you can still do **EVERYTHING** you can do on the web portal, except Print.

All buttons are now found on the home screen.

- The menu icon is used to change users, review profile & preferences, and log off.
- Red dots by a button indicate new information.

If you have not registered for the Patient Portal yet, please visit www.stegenevievehospital.org to submit an Online or Proxy Registration.

If you have questions or need help, Please call the SGCMH Patient Portal Team at 573-883-7745.

What can the SGCMH Patient Portal do for YOU?

View

- Recent doctor visits
- Upcoming appointments
